Subject: [JIRA] Commented: (OPS-1845) Restore MIT IP Addresses

[[http://\[REDACTED\]](http://[REDACTED])
[REDACTED]]

[REDACTED] commented on OPS-1845:

[REDACTED] spoke about rate-limiting the 18/8 subnet (outside of JIRA).
Let me know if this is something you want be to investigate. We should
be able to on the new [REDACTED].

[...]

Given the size of pdfs, I am serious about setting an all out bandwidth
limit for that net on the firewall if it's possible technically.

They were using about 50mb of bandwidth for a good part of Saturday. So, if
we limit the whole thing to 1-5mb that should keep the problem on their side
rather than ours. They'll run out of bits before we start to have site
problems. Though, that abuse appliance [REDACTED] was talking about after last
time sounds much effective than thi\$ idea ;).

> Priority: Urgent

>

> [REDACTED] is asking that the MIT range be restored. [REDACTED] asked that we take a metered approach and ease them back in if we can. I realize the whole Class A range is blocked at the firewall, but if we could enable the IPs not involved in this latest incident (aka, leave the Class C range suspended) that would be ideal in my estimation. Please advise.
