**Subject:** [JIRA] Commented: (OPS-1845) Restore MIT IP Addresses

---

[ [http://\[REDACTED\]](http://[REDACTED]) ]

[REDACTED] commented on OPS-1845:  
-----

[REDACTED] did say he pinned them to Princeton - not sure the method. Can you check the [REDACTED] logs to see if there is traffic to those servers from 18.x.x.x?

> Priority: Urgent

>

> [REDACTED] is asking that the MIT range be restored. [REDACTED] asked that we take a metered approach and ease them back in if we can. I realize the whole Class A range is blocked at the firewall, but if we could enable the IPs not involved in this latest incident (aka, leave the Class C range suspended) that would be ideal in my estimation. Please advise.
