This will have to be thought out a bit on our end as we need to take into consideration forward management of this. Any solution to metering bandwidth would need to consider the rate of change.

> Restore MIT IP Addresses

> is asking that the MIT range be restored. asked that we take a metered approach and ease them back
in if we can. I realize the whole Class A range is blocked at the firewall, but if we could enable the IPs not involved in this latest incident (aka, leave the Class C range suspended) that would be ideal in my estimation. Please advise.
