**Subject:** Re: MIT Update: It's worse than we know

Attached are 2 screen shots depicting PDF download activity from MIT for November and December. One show's all downloads and totals 2,854,824 for the 2 months. The other filters out downloads from the 3 IP's that look to be associated with the download abuse (18.55.6.240, 18.55.7.240, 18.55.5.237) and totals 17,865 for the 2 month period. Recognizing that some legitimate downloads may have occurred from the 3 filtered IP's, it would still be safe to say that about 2.8 million illegal downloads occurred during November and December. We know that some illegal downloading occurred prior to November and into January. I don't have those numbers yet. But looking at the graph you can see that some pretty aggressive downloading was taking place the last week of Dec (over 100k.day). It seems likely this extended into January for some period of time. It wouldn't be much of a stretch to say that as much of a million or more additional downloads may have occurred that are not reflected on this chart. I expect to have January data available for review by Monday. I'll also start loading Oct and Sept numbers as well to complete the picture.
