Hi Steve,

Please see the response below. In a nutshell, this is desired so that users first agree to our Terms & Conditions of Use before accessing the content.

Subject: RE: Technical Question

I spoke with ██████████ and ███████ , ███████ confirms that this was recognized during development and is intentional, as requested by ██████ We wouldn't want people to be able to link directly to PDFs, even as authorized users, without agreeing to the terms and conditions. This can be done through your MyJSTOR account, on a once per session basis on the public site, or, in this case, each time for direct links to PDFs.

Best,

████████████

Did you ever hear back from your guys on this?

Steve

Hi Steve,

I forwarded your question to our tech guys and will let you know what I hear.

Subject: Technical Question

███████

I have a question for your technical team. It has to do with how your pages present or presented themselves.

Why would the Title: "JSTOR:Terms and Conditions"

be associated with the URL: http://www.jstor.org/stable/pdfplus/29737.pdf

in a Mozilla browser's internet history file?

It must have to do with how your pages present themselves to users that I don't understand.

Thank you for passing the query on.

Steve
