Subject: [JIRA] Commented: (OPS-1845) Restore MIT IP Addresses

[[http://\[REDACTED\]](http://[REDACTED])

[REDACTED] commented on OPS-1845:

Based on the latest conversation with MIT, here are the steps:

- 1) Work with MIT to add/ensure access to their proxy
- 2) create an Ad directed to MIT that will alert users to go to the proxy and sign in
- 3) Remove all but the proxy IPs from MITs access range

> Restore MIT IP Addresses

> Priority: Urgent

>

> [REDACTED] is asking that the MIT range be restored. [REDACTED] asked that we take a metered approach and ease them back in if we can. I realize the whole Class A range is blocked at the firewall, but if we could enable the IPs not involved in this latest incident (aka, leave the Class C range suspended) that would be ideal in my estimation. Please advise.
